

## YOUR PARTNER FOR TECHNOLOGICAL INNOVATION AND PROTOTYPE DEVELOPMENT

**WAVE CONTROL SYSTEMS CAN HELP YOU  
TAKE YOUR TECHNOLOGY TO THE NEXT LEVEL.**

### WHO WE ARE

Our multidisciplinary team of engineers can help you take your technology to the next level. Small or big, we are open to discussing technological partnerships and grant applications for various industries. Your innovative idea and our resources in product engineering and development could make for a great team. Contact Wave Control to discuss options such as cost and equity sharing for new technologies.

### PRODUCTS

Wave Control also offers its own proprietary innovative products aimed at improving chemical use efficiency and reducing GHG and CAC emissions. These include:

- UCS systems: Precise, remote, and intelligent sensing and metering of chemical injection for a large variety of applications
- Precise chemical mixing and handling systems
- Engineered process equipment
- Process, Controls, and Automation Systems

For our full list of products and technologies, visit [www.wavecontrol.ca/our-products](http://www.wavecontrol.ca/our-products)

**WAVE SUPPORTS INDUSTRY COLLABORATION  
AND DEVELOPS PARTNERSHIPS TO GET NEW  
TECHNOLOGIES AND PRODUCTS OFF THE GROUND.**

### WE OFFER:

- Mechanical, chemical, and electrical instrumentation and controls engineering services
- Support in accessing and satisfying grant programs that fund clean tech innovations and technologies
- An R&D facility and product development experts
- Production of bench-top or lab-scale prototypes, or modular plug-and-play pilot modules
- Custom engineered specialty fittings and valves with CRN registration
- Fluid and material feed and control process equipment, including injection, measuring, sampling, mixing, heating and cooling equipment
- Design and fabrication of specialty parts, products, or equipment intended for a new process or trial
- In-house testing for fabricated parts and components
